ACADEMIC PROJECTS

Enterprise Level Food Ordering System

- Built using React, Node, MongoDB, and TypeScript.
- Features user registration, restaurant search, cart handling, Stripe checkout, and real-time order tracking.
- Styled with Shadcn/sooner and Tailwind, integrated with GitHub, Auth0, Stripe, and Cloudinary.

INDEPENDENT PROJECTS

Interstellar T20 Dream Team

- Used T20 World Cup 2022 data to identify the best 11 players for a hypothetical match against aliens.
- Collected data via web scraping from ESPNcricinfo.
- Transformed and cleaned data using Pandas.
- Visualized data with Power BI dashboards.

YouTube Bookmarking Chrome Extension

- Developed a Chrome extension using Manifest v3 to bookmark YouTube timestamps.
- Featured key components like manifest.json, content scripts, and service workers.
- Focused on data fetching, user interaction, and Google web store distribution.

Real-Time Multiplayer Tic-Tac-Toe

- Developed a real-time multiplayer Tic-Tac-Toe game with Socket.io.
- Enabled players to connect, interact, and compete from different devices.
